

Day 2 Lab Assignments

Do the following Assignments (Try to make your pages HTML5 valid, and don't use deprecated tags or attributes):

1- Redn bar and footer) esign your home page in this layout:

2- (Three column layout with header, navigation

Note:

- Don't use tables inside main layout, use divs except, use tables in the main layout only (4 rows, 3 columns).
- Steps in **Red** color are self study (bonus).
- Facebook and twitter links open your facebook and twitter page in a new page.

- 3- Create contact me page, and name it (Contact.htm), and create form and use get method (what is the difference between get and Post?)

Contact me Form (table caption)

Contact me	
Your Name:	Text box
Your opinion on the website:	Radio buttons with options: (Very good, Good, Fair), each option in separate row.
Gender:	Radio Buttons with options: (Male, Female), each option in separate row.
Marital status:	Dropdown list with options: (single, married, other). And make “other option” is the default choice.
You know about my website from:	Dropdown list with options: (internet, friend, search engine, other), and user can select more than one option.
Mail:	Textbox
Subject:	Textbox
Message:	Text area
2 Buttons (submit, reset)	

Submit button redirect user to page named (Thankyou.htm), which contains text:

Thank you for contacting me.
Your mail sent successfully.

- 4- Redo the previous assignment in a new page without using table:
- Remove the table.
 - Use Labels and Fieldset.
 - Use tabindex and access key.
- 5- In your profile (home page), display any video from youtube using iframe.

Bonus Assignments:

- 1- Rewrite your home page to be a valid HTML5 valid page, and replace any deprecated tags and attributes with CSS styles (You can use any Editor in that assignment. For example: Expression web).
-

- 2- Try to redo assignment No.1, without using tables (use Tableless layout using CSS and div& span or HTML5 new layout elements).
 - 3- Search for Tables different layouts and styles and try it.
 - 4- Try HTML5 new features in forms
-
